ON LOW SPIRITS.

Low spirits is a certain state of the mind, accompanied by indigration, wherein the greatest evils are apprehended upon the slightest grounds, and the worst consequences imagined. Ancient medical writers supposed this disease to be confined to those particular regions of the abdomen technically called hypechondria, which are situated en the right er left side of that carity, whence comes the name hypechondriasse.

which are situated on the right or left side of that ea-rity, whence comes the name hypochendriasis.

Nowed-me. The common expressed symmtoms are, flatulency in the stomach or bowels, acrid sructations, consistences, spasmodic pains and often an otter inabili-ity of fitting the attention upon any rebject of impor-tance, or engaging in any thing that demands virgour or courage. Also languidness—the mind becomes in-ritable, thoughtful, desponding, melancholy and deject-od, accompanied by a total derangement of the nerrous system. The mental foelings and poculiar train of idors that haunt the imagination and overwhelm the judgment, exhibit an infinite diversity. The wisest and best of men are as open to this affliction as the weak-est.

THE BARON VON HUTCHELER HERB PILLS.

THE BARON VON HUTCHELER
HERB PILLS.

These Fills are composed of Herbs, which exert a
specific action upon the heart, give an impulse or
strength to the arto-i-I system; the blood is quickened
and equalized in its circulation through all the vessels,
whether of the skin, the parts situated internally, or
the extremities; and as all the secretions of the body
are drawn from the blood, there is a consequent increase of every secretion, and a quickened action of
the absorbent and exhalent, or discharging vessels. Any
morbid action which may have taken place is corrected, and obstructions are removed, the blood is purified,
and the body recurse a healthful state.

These Pills, after much anxious toil and research,
having been brought by the Propristor to the present
state of perfection, supersede the use of the innumeratile other medicines; and are so well adapted to the
frame, that the use of them, by maintaining the body
in the due performance of its functions, and preserving
the vital stream in a pure and healthy state, causes it
to last many years longer than it otherwise would, and
the mind to become so composed and tranquil, that old
age when it arrives, will appear a blessing, and not (as
too many who have neglected their constitutions, or
had them injured by medicines administered by ignorance) a source of pissery and abhorence.

They are so compounded, that by strengthening and
nalizing the action of the heart, liver, and other viscera, they expel the bad, acrid or morbid matter, which
renders the blood impure, out of the circulation, thro
the exerctory ducts into the passage of the bowels, so
that by the brisk of alight evacuations, which may be
regulated by the doges of the Iferb Pills, always
remembering that while the evacuations from the bovels are kept up, the exerctions from all the other vessels of the body will also be going on in the same proportion, by which means the blood invariably becomes
